

Forms in Angular

Forms Overview

□ What are forms?

- **Forms a really important part of any data-driver application:**
They are the primary way to collect data from the user
- **We have seen forms many times:**
When we login or register in an application
When creating orders for pizza, shoes or anything else...
- **The forms have the so called input fields:**
Different way to collect data
Text fields, radio buttons, checkboxes, dropdown lists, etc...

Forms in Angular

Angular provides two different approaches to handling user input through forms

1. Template-driven forms.
2. Reactive forms (or model-driven).
